

Are you interested in volunteering to speak in schools on this year's Engineering and Technology Champions programme and improving your presentation skills at the same time? If so ICT Ireland and STEPS to engineering, in association with Cork Electronics Industry Association, are delighted to offer volunteers a free half-day workshop with a half-day CPD credits on presenting engineering and technology to students.

This workshop will take place on

Tuesday 28th August
in
Jurys Hotel, Cork

and volunteers can choose between attending the morning or afternoon session.

All volunteers are cordially invited to join us for lunch, where our guest speaker will be Prof. Roger Whatmore, Director of the Tyndall National Institute, the largest information communications technology research centre in Ireland. He will speak about his personal career path in the technology sector. Lunch will also be provided free of charge.

Places are limited so please book online at
http://www.ictireland.ie/0/Champions_Programme_Workshops

About the Engineering and Technology Champions programme:

The Champions programme aims to encourage second level students to consider careers in engineering and technology, by providing volunteer speakers to the schools. Volunteer speakers are usually engineers or IT professionals, although they may be working in other roles within the technology sector. Participants will be expected to undertake one or two school visits during the year. Participants will be provided with handout materials and a presentation template, and will be matched with a school near their work or home.
